

Roads Services Training Group

2025 Roads Conference and Exhibition

TOPIC:

There continues to be many demands in terms of maintaining and improving the regional and local road network. The main focus of the regional and local road investment programme is the maintenance of the network including resealing of road surfaces along with road and bridge rehabilitation works and adapting our infrastructure to the impacts of climate change. A number of new projects are also being constructed under the National Development plan, while other projects are currently in development to ensure a robust pipeline of future work to help meet the demands on the regional and local road network. There is a need to address issues in new and innovative ways which is on-going via various pilot programmes.

The Conference will provide a context to investment in roads by reference to developments in relation to Climate Change, Asset Management, Road Safety and Training amongst others.

It will also seek to provide an update to delegates on the current activities in the roads sector and initiatives underway. It is intended to address issues relating to:

- Case Studies
- Asset Management
- Grants Management
- Climate Change & Adaptation
- Safety
- Training
